BLOOD TO FLOW.

RAILIGH, N. C., Aug. 90.—The attempt of President Polk at the Alliance state convention must week at Morehead City to have resolution adopted denouncing the News and Observer of this city for its attack on imself so angered Ashe and Jernegan, the efficies that they denounced Polk during ast week in the most insulting terms. Polk ord here yesterday and had a consulta to-day with his friends. He was ad ised that he had reached a point where he have fight. That not to do so was to per-tit himself to be branded all over the state s a coward. Such a course would rule im and destroy the Alliance in North Carthat Gentlemen have tendered their crylers in case "the code" is resorted to r satisfaction. Polk left here for Char-te, where he speaks to-day. The ex-sected challenge will be sent as soon as he cturns to this city. J. L. Ramsay, Polk's sistant editor, has also been denounced. Its believed he will send a challenge as bon as he returns from Asheville. He is said to hold himself amenable to the code The pending encounter is the talk of the city to-day.

Money Plentiful. New York, Aug. 26.—The stock market again active and strong to-day, making substantial progress toward high figures in all portions of the list. At times there was a buoyant tone to dealings. The money sitnation seems to be secure as far as can be foreseen, and with the surplus now in the banks and the disburgements of the govcrimient, including the payment of 4% per cents to be redeemed, there is little likelihood of a squeeze in money for some time to come. In to-day's market Grangers were again in the first place as far as activity goes and realizations assumed large proportions in them, indused by the kink forms. coes and realizations assumed large propor-tions in them, induced by the high figures to which they had attained, while the ef-forts of the bears to force a reaction of sub-stantial proportions aided in weakening the

Measuring Strains on Bridges.

A French engineer has devised a method of accurately measuring the strains on iron and steel bridges, using for the purpose two brackets, which are attached some distance apart to the beam to be tested. On one bracket is a water chamber, closed by a flexible diaphragm and connected with an open tube, which serves to register, by the height of the tube, any pressure made on this diaphragm. One end of a pointed rod is connected with this metal covering to the water chamber, while the other is suitably joined to the other bracket. It is thus seen that any elongation of the bridge member causes a motion of the diaphragm and a fail of the water in the fine tube.-

THE WEEK.
Raws advanced 1-16c. Refined advanced 11sc. Receipts 32,633 tons, against 28,420 tons last week, and 16,157 tons for corresponding week last year. Meltings 40,000 tons. Total stock in four ports 170,711 tons, reginst 178,078 tons last week, and 117,584 tons at the same time last year—a decrease of 7367 tons for the week. Total stock in all the principal countries at the latest un-even dates is 956,100 tons, against 971,531 tons last week and 781,271 tons at the same uneven dates last year.

Notwithstanding there was no transac-tions during five days of the week the market maintained a great degree of strength, and contrary to usual precedent after such duliness, the demand was resumed at the previous basis of values. Buyers even show more anxiety than sellers, and very few sugars were offered for sale except at an advance of 1-16c. Even at 356 for centrifugals it is somewhat doubtful if a large supply can be had. The firmness of holders grows out of the statistical position of sugar throughout the world. At the close a cargo of Porto Rico muscovados sold at 31-16c to Baltimore, and centrifugals are rumored at

over 3 7-16c. The demand was so moderate during most of the week that there was a constant accepting of orders at below the posted prices for many grades of softs, and at ore time Philadelphia was soliciting orders for granulated at 1-16c under the New York quotations and it looked like a renewal of the demoralization of the former week, but the American sugar retining company adopted the opposite course to relieve the surplus of the Spreckles refinery, and suddenly advanced granulated the yesterday, giving Philadelphia refiners the market, un-less they chose to follow the advance. Phila-delphia has followed the advance, and today buyers must pay the advance every-where for granulated, say 4-16c, when re-duced to the net cash price, with all discounts off. The demand is apparently only moderate, simply because refiners continue to over-produce and stimulate the consumption as much as possible. In reality the de-mand is large and the demands upon the raw market for supplies of sugars necessitated the last advance in refined and will eventually cause another advance.

Chicago, Ital. And the The speculative markets on charge to day acted irregularly with grain, averaging wealer, and processoes were weaker. Trading was fairly notice, and local localing to corn and where was bearing, but easily surried on receipt of any builds news. Where weak and lower at the opening December started \$100 gpt 60; and sold to \$100. Offers were readily absorbed, however, and early selects were soon highing to get have and early selects were soon highing to get have wheat they had parted with and giving the buils a chance to get in their week.

On buildshadvices the market soon began to display much strength, and December Busily improved by then broke 2c. a nervous feeling being apparent on the part of traders, who were apprehensive over the effect of impending large deliveries of grain in the Nortwest Later wheat again had another beinge December selling up to \$100 to and closing at \$100.

Action in corn to-day was almost a repetition

8) 044; Action in corn to-day was almost a repetition Action in corn to day was almost a repetition of yesterday, though on a smaller scale. The market was easy during the first hour. September started at 60½ and October at 50½ corober sold down to 55½ carly, rallied and held stendy until inter on, when the statten jump in wheat caused a scare among corn shorts, and September made a quick spurt to 65%, and October went up to 60½. The clique then began to self, and there was a rapid break to 64¼ for September and 50¢ for October. September closed at 60½ and October at 50½ c. Provisions were only fairly active, and prices Provisions were only fairly active, and prices

generally easier.
